

I-O DATA

The 33rd term Annual Report

From July 1, 2007 to June 30, 2008

I-O DATA DEVICE, INC.

Greetings to Our Shareholders

I hope this report finds you well. Please allow me to take this opportunity to express my utmost gratitude for your continued generous support. As of June 30, 2008, we completed our 33rd fiscal year (from July 1, 2007 to June 30, 2008). Hence, I would like to hereby report an overview of our business performance and other relevant information. I sincerely hope you will grant us continued support and guidance for the future.

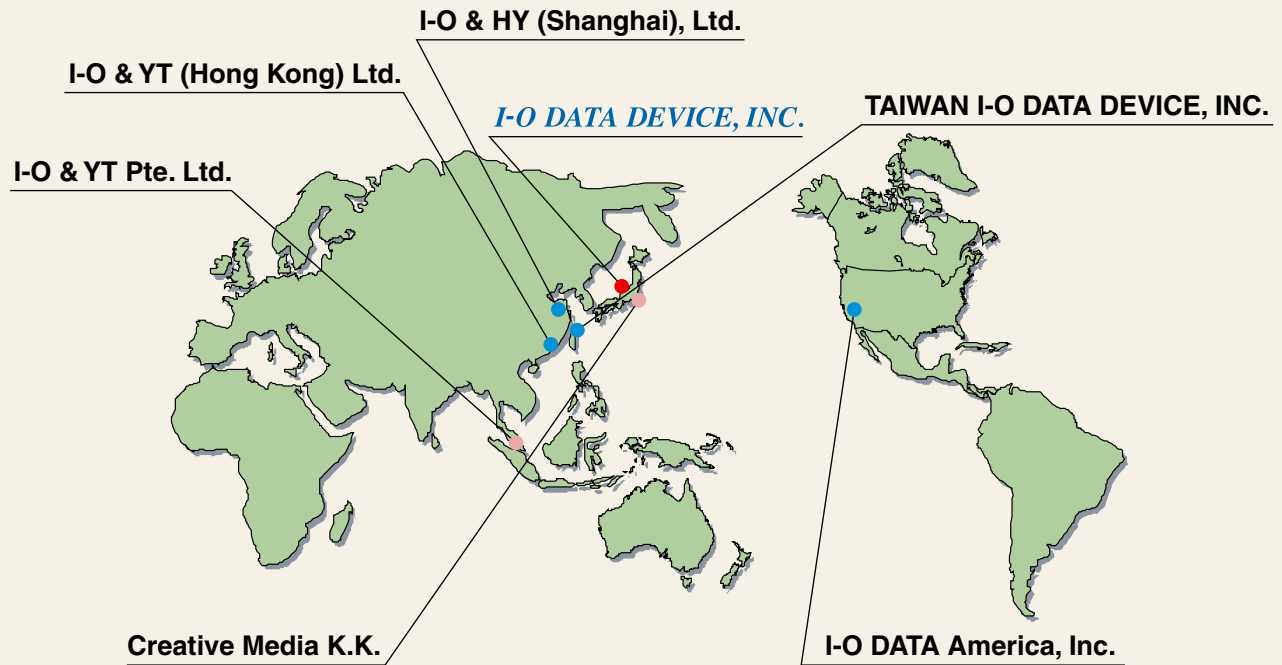

A handwritten signature in black ink that reads "Akio Hosono". The signature is written in a cursive, flowing style.

The Outline of Sales

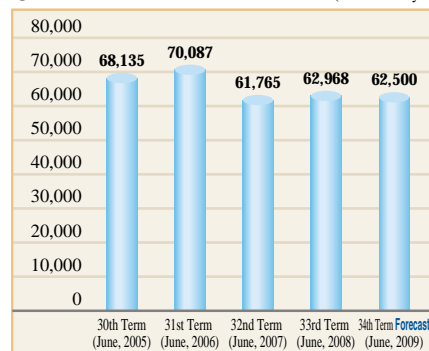

The Japanese economy, during the current consolidated fiscal year, was in a moderate recovery phase as the employment situation showed signs of a stable increase on the back of solid corporate earnings, and personal consumption was also steady. However, issues slowing the economy, such as the surge in crude oil and materials prices, the turmoil in financial markets triggered by the subprime loan (or home mortgage loans to lower-income households) crisis in the United States, and lower stock prices, had a multiple effect in the latter half of the year, leading to stagnant corporate earnings and the slowing of capital spending, and in turn, a sharp decline in economic confidence.

In the domestic personal computer (PC) market, to which our group of companies is exposed, a series of new products with built-in one-segment (television broadcast) service capabilities or digital terrestrial tuners were introduced particularly for the consumer market and spurred demand with an eye on the Beijing Summer Olympic Games. However, according to a report by the Japan Electronics and Information Technology Industries Association (JEITA) on July 25, 2008, domestic PC shipments between July 2007 and the end of June 2008 fell for the second year in a row, declining 15.5% year-over-year in terms of units and 15.6% in value. Unit prices, reflecting both desktop PCs and portable PCs, remained almost unchanged compared to the previous year, at the 120,000-yen mark.

Under such circumstances, our group of companies has been working to redress high-cost structures, aggressively pursue new business or products that will lead to profit increases, and eliminate losses within the company since the beginning of the fiscal year. Capital investment shrank in the corporate customers market due to the surge in crude oil and material prices, lower stock prices, and financial unrest, even though there is continued eagerness to invest in information technologies. On the other hand, wide liquid crystal displays (LCD), hard disk drives (HDD), mainly with 500 GB capacity, and during the first half of the year, one-segment tuners, as well as multimedia products, including digital terrestrial tuners from May in the latter half of the fiscal year, contributed to sales. As a result, revenue increased 1.9% from the previous consolidated fiscal year.

Turning to profitability, operating, current, and net profits were all positive as of the previous consolidated fiscal year as the whole group worked to reduce the cost of products starting from the purchase of materials, and with the boost from the higher yen having a huge impact.

● Net Sales (Millions of yen)

● Operating Income (Loss), Ordinary Income (Loss) (Millions of yen)

● Net Income (Loss) (Millions of yen)

As a result, group sales for the consolidated fiscal year rose 1.9% year-over-year to 62,968 million yen. As for profits, operating profit improved to 2,093 million yen from a loss of 44 million yen the previous consolidated fiscal year, while current profit jumped to 1,816 million yen, or a 1,535.8% increase over the previous year. Net income was 1,166 million yen (compared to a 657 million yen loss the previous consolidated fiscal year) with the impact of a special loss related to the cost of repairs for a product sold to specific clients. But nevertheless, overall, we achieved higher sales and profits.

Looking ahead, we expect the economic environment surrounding our group of companies to become even more difficult, with the continued surge in global materials prices, crude oil prices, the steep rise in the yen, and the escalation of the subprime lending woes in the United States. The timing for a recovery in corporate capital spending remains uncertain, and on top of this, competition with rival companies in the market is expected to further intensify, while the needs of consumers for products and services may become even more diversified.

Under these circumstances, our group intends to work on (1) strengthening the competitiveness of existing business and maintaining profit, (2) establishing new businesses, and (3) achieving greater soundness in our internal system through efforts to maintain the high quality of products we produce, and advance to become a company that is trusted by its customers.

● Capital Investments (Millions of yen)

● Depreciation Expense (Millions of yen)

● Research and Development Costs (Millions of yen)

Outline of Sales by Division

Extension Memory Board Division

In the memory board business, although unit sales volume rose reflecting higher demand for extensions from the spreading of the new operating system Windows Vista, the sales price declined due to the impact of the lower market price for DRAM, which is a major component, thus revenue fell below the previous consolidated fiscal year. For flash memory products, led by memory cards and USB memory devices, the situation was

similar, but with heightened competition, sales dropped compared to last consolidated fiscal year. As a result, sales in the Extension Memory Board Division fell 20.5% year-over-year to 11,497 million yen.

Storage Division

Sales of hard disk drive (HDD) products surpassed the previous year, supported by firm demand throughout the consolidated fiscal year, particularly for external large capacity hard drives. As for DVD products, demand bottomed out in the last consolidated fiscal year and was on track to a recovery as the shift to next generation Blu-ray Discs began, and sales rose to exceed the previous consolidated fiscal year. As a result, the Storage Division

posted sales of 19,739 million yen, up 12.2% from the previous year.

Liquid Crystal Division

LCD product sales were supported by steady demand from corporate customers. At the same time, in light of declining consumer demand for additional sets, we expanded our product lineup from the traditional 4:3 aspect ratio models to wide-screen models, introduced models with pre-installed digital terrestrial tuners before others in the market, and made aggressive advertising efforts. As a result, the division posted

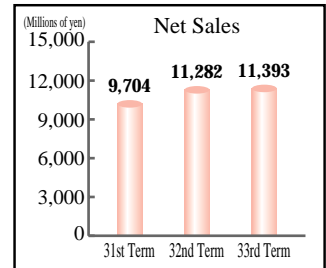

sales of 13,891 million yen, up 0.9% year-over-year, to maintain previous consolidated fiscal year levels.

Peripheral Division

Sales of multimedia products rose from a year ago, as we began sales of add-on tuners for PCs with digital terrestrial broadcast reception capabilities at the end of the fiscal year, on top of one-segment tuners, which were introduced in the latter half of the previous consolidated fiscal year and contributed to sales throughout the year. Furthermore, sales of NAS (network attached storage) products grew in both the corporate and general customers markets on the back of the rising need to share data via networks and our efforts to cultivate the market. On the other hand, sales of AVeL products, mainly network media players for general customers, fell compared to last year because the players were between product introductions.

As a result, the Peripherals Division had sales of 11,393 million yen, up 1.0% from the previous consolidated fiscal year.

Custom Order Product Division

Sales showed a 155.6% increase over the year-ago period to 4,126 million yen, due to firmness in OEM products such as STB products for video distribution services over the Internet and digital terrestrial tuner products.

Others

Sales fell below the previous consolidated fiscal year in the latter half of the fiscal year, particularly from overseas, because of the impact of I-O & YT Pte. Ltd. becoming an equity method affiliate in January 2008. As a result, sales from the division declined 23.7% year-over-year to 2,321 million yen.
