

I-O DATA

The 45th term Annual Report

We would like to take this opportunity to express our utmost gratitude for your invaluable support.

As of June 30, 2020, we completed our 45th fiscal year. Hence, we would like to hereby report an overview of our business performance and other relevant information.

We sincerely hope that your support for us will continue in the future as well.

Greetings to Our Shareholders

The “I” and “O” in our company name, I-O DATA, come from the words “Input” and “Output,” respectively.

Looking back on the past, our core activities have been focusing on inputs and outputs of data since our foundation.

Now that most of the products that we release are peripherals for PCs and smartphones, many people use our products in their daily lives.

In the last few months, our lifestyle has changed drastically. It is very difficult to go back to days exactly the same as those we took for granted.

For instance, we can no longer ignore the risk of getting together, often have to decide to go or not to. However, those aren't the only choices. One of the additional answers we can offer is “PlatCast,” an audio streaming service. (You can easily broadcast/join events without making real crowds with this solution.) We believe that it is our mission to continue to provide the world with “another option” that is not limited to two choices.

We will continue to do our best to meet your expectations. We sincerely hope that your support for us will continue in the future as well.

Akio Hosono, Chairman, Representative Director
Naonori Hamada, President, Representative Director

Net Sales (Millions of yen)

Operating Income (Millions of yen)

Ordinary Income (Millions of yen)

Overview of the Fiscal Year under Review

During the current consolidated fiscal year, the Japanese economy worsened rapidly due to the global outbreak of the novel coronavirus, amid the economic slowdown caused by trade frictions between the United States and China, geopolitical risks and other factors. The domestic digital equipment market including PCs, consumer electronics, and smart devices, in which our group participates, remained robust in the first half due to factors such as renewal demand for PCs and growth in the esports market. In the second half, restrictions on activities due to the spread of the novel coronavirus infection gave rise to demand related to working from home and studying at home. However, for some corporate IT investments, postponement and a cautious approach were seen, and demand weakened overall. Supply chains were disrupted during the period from February to April, but were almost normalized at the end of the fiscal year under review. Under these circumstances, we worked to capture growth opportunities through the expansion of products and services throughout the fiscal year under review. Amid the spread of the novel coronavirus infection, we were forced to steer the difficult situation where new products were launched with restrictions on people's attendance, while facing disruption of supply chains and unusual increase and decrease in demand. We worked, however, to continue normal operation based on working from home, placing ultimate priority on the safety of our customers, business partners and employees. As a result, we posted group sales of 56,204 million yen (down 5.1% from the previous year), mainly reflecting decreased sales of hard disk drives, which saw its market share decline compared with the previous year, and sluggish sales of brand products manufactured by other companies, despite increased sales recorded by the Memory Division, liquid crystal monitors, and the Peripheral Division, which captured opportunities. In terms of profit, gross profit increased slightly compared with the previous year. However, selling, general and administrative expenses increased mainly for research and development costs and depreciation, and we posted operating income of 2,127 million yen (down 4.6% from the previous year). We posted ordinary income of 2,542 million yen (up 17.0% from the previous year) due to the recording of foreign exchange gains of 383 million yen in other income. We posted net income attributable to owners of parent of 1,874 million yen (down 10.1% from the previous year).

Future Outlook

Looking at the future business environment, under the circumstance where it is unforeseeable when the novel coronavirus infection will fade, the economy is expected to recover gradually. The outlook will, however, remain unpredictable due to a cautious view on corporate capital spending and personal consumption. In the digital equipment market including PCs, consumer electronics, and smart devices, in which our group participates, we forecast that the coronavirus catastrophe will cause a decline in demand and that renewal demand for PCs, which peaked in the previous year, will decrease. On the other hand, expectations are growing for the spread of tools and services which enrich our lives and support the New Normal era where not only prevention of the infection but also social and economic activities are pursued. Under these circumstances, we will focus on timely proposition in line with new lifestyle and proposition specific to business and usage scenarios, keeping an eye on changes in the society even more. In addition, by enhancing customer-based sales based on region as well as support, we will ensure a long-term relationship with our customers. Placing ultimate priority on the safety of our customers, business partners and employees, we will continue to strive to prevent the spread of the novel coronavirus infection both inside and outside the Company.

Based on the recognition above, in terms of the consolidated business results forecast for the next fiscal year, we expect to achieve group sales of 57,000 million yen (up 1.4% from the previous year) in anticipation of higher sales mainly for liquid crystal monitor and the Peripheral Division due to the spread of working from home and acceleration of the utilization of ICT in the education field, though demand is expected to be weak overall. In terms of profit, we forecast gross profit of 11,000 million yen (up 0.9% from the previous year), selling, general and administrative expenses of 8,900 million yen (up 1.5% from the previous year), and operating income of 2,100 million yen (down 1.3% from the previous year). Taking into account other income and other expenses that are expected to be incurred on a regular basis in view of our historical business results, we are forecasting ordinary income of 2,100 million yen (down 17.4% from the previous year), and net income attributable to owners of parent for the current consolidated fiscal year of 1,450 million yen (down 22.6% from the previous year).

Net Income Attributable to Owners of Parent (Millions of yen)

The forecast exchange rate is 105 yen per U.S. dollar.

Notice of Resolution of the 45th Ordinary General Meeting of Shareholders

Security Code: 6916
September 24, 2020

Dear Shareholders:

We would like to express our appreciation for your continued support and patronage.

The following matters were resolved at the 45th Ordinary General Meeting of Shareholders of I-O DATA DEVICE, INC. (the “Company”).
